

Mosyle MDM for Education — Comprehensive Research Summary

1. What Mosyle Is

Mosyle is a cloud-native, Apple-exclusive Mobile Device Management (MDM) and security platform. Its education product is called **Mosyle Manager**, designed exclusively for K-12 schools. It was originally founded as an iPad-first Learning Management System provider, then pivoted to MDM after hearing frustration from schools about legacy MDM providers.

- **Market reach:** 52,000+ customer accounts managing 7+ million Apple devices globally (2026 figure); over 20,000 schools
- **Supported platforms:** macOS, iOS, iPadOS, tvOS, watchOS, visionOS
- **Headquarters:** Winter Park, Florida
- **Website:** <https://school.mosyle.com/>

3. Core MDM Capabilities for iPad at Scale

Deployment

- **Zero-Touch Enrollment** via Apple School Manager / Automated Device Enrollment (formerly DEP)
- **Apple Configurator 2** support for non-ASM devices
- **Manual Safari enrollment** for devices already in use
- Scales from 100 to 100,000+ devices
- **Mosyle Embark:** guided onboarding tool for Mac (included in OneK12)

Configuration & Policies

- Passcode policies, restrictions, device authentication
- Single App Mode / Kiosk Mode
- Wi-Fi, VPN, DNS, cellular configuration
- Google/Microsoft/AD/LDAP/SCEP integration
- Mail, calendar, web clips, notifications, AirPrint, AirPlay, wallpaper, fonts

Shared iPad Management

- Dedicated deployment workflows for shared devices
- Exclusive **Shared iPad Carts management tools**
- Per-student personalized experience on shared hardware

BYOD (Bring Your Own Device)

- Uses **Apple User Enrollment** for privacy-first management
- Cryptographic data separation — manages only school data, no access to personal data
- Clean unenrollment removes school data without wiping personal content

App Deployment

- Install/update App Store apps via Apple School Manager (VPP/Apps & Books) with device-based licensing — no Apple IDs needed per student
- **Custom Apps** and **Enterprise Apps** support
- macOS PKG & DMG installation
- **Mosyle App Catalog**: auto-install and patch non-App Store macOS apps without PKG handling
- Dynamic/automated install and patching workflows
- **Temporary Apps** with automated license management
- Secure hosting for PKG, DMG, and IPA files

Remote Management Commands

- Lock, erase, reboot, activate Lost Mode
- Remote scripting for macOS (with AI script generation)
- Script Catalog with ready-to-use scripts
- Secure screen sharing for iPad and Mac

4. Classroom Management Features

Mosyle's **Class Manager** provides teacher-facing tools:

Feature	Description
Study Apps	Teachers select allowed apps; everything else is temporarily hidden on student devices
Study Sites	Temporary allowed website list for class time
App Lock	Lock student device to a single app (students cannot exit)
Safe Test Mode	Lock students into a specific webpage for assessments — prevents navigation elsewhere
Live Screens (macOS)	Teachers view student screens in real-time; can take screenshots
Heads-Up Command	Alert/notification to student devices
Quick Poll	In-class polling
Class Feed / Class History	Activity tracking and history
Application Timeline (macOS)	Track what apps students are using
Device Compliance Check	Verify devices meet teacher-defined policies
Camera/Bluetooth Control	Enable/disable camera and Bluetooth on student devices

- Works across any network (school, home, remote learning)
- Integrates with Apple Classroom app
- Teachers configure classes with “one click” to apply all settings

5. Content Filtering & Web Security

Technology

- **Encrypted DNS-based filtering** — operates at the device OS layer

- Works regardless of network (school Wi-Fi, home, cellular)
- No additional software required beyond MDM enrollment

Filtering Capabilities

- **Standard filters:** Pre-curated filters for typical school needs
- **Custom filters:** 100+ domain categories, unlimited combinations
- **SafeSearch enforcement:** Google, YouTube, Bing, DuckDuckGo
- **Browser enforcement:** Automated on Chrome and Firefox
- **Bypass protection:** Proprietary list of 500+ iPadOS apps that could circumvent filtering
 - blockable with one click

Security & Threat Protection

- AI-based threat databases updated several times daily
- Proprietary database of domains linked to Apple device malware
- Filters by **domain age** and **host country**
- Protection against phishing, malware distribution, fraud, spyware, spam
- Automated device isolation when threats detected

Compliance & Logging

- **CIPA Compliance:** Full logging for students with one click
- **Staff privacy:** Configurable logging (blocked-only or disabled); when reduced, no one can see browsing history
- Robust logging and reporting capabilities

6. Security Suite (Endpoint Protection)

Included in **OneK12** tier:

- **Device Scout:** Automated security compliance scanning and remediation against K-12-specific rules (iOS and macOS)

- **Detection & Removal:** AI-based malware/antivirus protection — auto-installs on current and future devices
- **Automated Hardening & Compliance:** Scanning and patching for both iOS and macOS
- **Privilege Management:** Admin On-Demand with automated rollback
- **Security Reports:** Comprehensive reports and ready-for-audit security logs
- **Mosyle Auth 2:** macOS SSO with Google Workspace, Microsoft 365, AD FS, LDAP, with MFA support and automated FileVault account creation
