

Frank → NBA (Erin + Annie + Dave) — Post-7/7 walkthrough summary + Phase 1 next steps (DRAFT 2026-07-09)

Frank → NBA — Post-Walkthrough Follow-Up (DRAFT)

Send channel

- **From:** Frank Lucido frank.lucido@gmail.com
- **To:** Erin Minuth Terris erin@northbridgeacademy.org
- **Cc:** Annie Crowder annie@northbridgeacademy.org, Dave dave@northbridgeacademy.org
- **Subject:** Following up on Tuesday — Mosyle + Apple School next steps

NOTE for Frank before you hit send: 1. Google OAuth still revoked (Day 16+). Send via Gmail web compose in browser, not the API. 2. **Dave's email is a placeholder** — the dossier lists Dave's email as "(not yet known)" and the 7/7 meeting doc captured this as an open question. Replace dave@northbridgeacademy.org with Dave's actual email + add his full name in the greeting if you have it. 3. If you don't have Dave's email yet, two options: (a) send to Erin + Annie only and ask Erin to forward to Dave, or (b) draft a separate copy of this email to forward to Dave once you have the address. (a) is faster; (b) keeps Dave in the loop directly. Your call. 4. The Apple inventory doc Erin pulled day-prior is at [\[\[leads/ltc-north-bridge-academy/Apple iPad Accessibility Features — Complete Structured Inventory\]\]](#). I'm building an engagement-ready inventory list from it today — that becomes a separate attachment once it's ready, NOT in this email.

Email body

Hi Erin, Annie, and Dave,

Thank you both for the time on Tuesday — it was really helpful to walk the building with you, Erin, and to see how Mosyle and Apple School Manager are actually configured day-to-day. A few things crystallized for me once I was on-site, and I wanted to capture them while the trail is fresh so we can move cleanly into August.

What I confirmed on-site

- I have admin access to Mosyle on the NBA account. Good to go.
- I have access to Apple School Manager alongside Mosyle. That's the first time I've been able to look at both side-by-side for your school, and it's helpful for shaping the rollout.
- The 121 iPads spanning Hamlin-vintage through new 1:1 models are accounted for, and the per-homeroom cart model (12 iPads per cart) is a clean structure to organize around.

One thing worth flagging now

Apple School Manager shows only 8 of your Macs enrolled. I don't know yet whether the others were never added or were added under a different account — that's a question to sort out before the August rollout, because Mosyle and Apple School Manager need to be in sync for zero-touch iPad deployment to work as cleanly as it can. It's a small cleanup task; I just want it on our radar now rather than discovering it the morning of rollout.

Where I'd suggest we focus Phase 1

Based on what you both shared, here's the path I'd recommend we lock in for Phase 1, in this order:

1. **Reorganize Mosyle by Lower School and Middle School.** That gives every teacher a sensible default for which apps land on which iPads, and lets us personalize later for individual students who need specific configurations. You mentioned this is the partition you had in mind — I think it's the right one.
2. **Turn on Apple Classroom for middle school.** That's the live-screen-view piece middle school teachers have been asking for. It pairs with Mosyle for app deployment and gives teachers a single workflow.
3. **Set up a filtering policy that lets teachers control YouTube access per class.**
Selective YouTube is one of those things that's genuinely useful in some lessons and genuinely distracting in others. We'd build the policy in Mosyle and let teachers toggle it themselves.
4. **Clean up Apple School Manager so all your faculty Macs are enrolled.** Small task, big payoff — once it's clean, the August iPad rollout can run on autopilot.

I'd plan to do (1) and (4) in the next couple of weeks, and (2) and (3) once Erin is back on campus week of 7/27 so we can test the classroom piece in a real classroom with real students before the August push.

Two small things I'd like to follow up on

- The Logitech keyboards you mentioned — I want to capture which models are currently in use so I can do a quick compatibility check. No purchase commitment; just research on my side.
- The Procreate app deployment — whether you'd want it per-student licenses through Apple School Manager, or shared-cart. We can decide that one closer to August.

I'll plan to send the initial inventory list as a separate attachment once I've refined it from what you pulled day-prior, Erin. That gives us a working document for the device-group cleanup rather than a one-shot snapshot.

Let me know if anything here reads off, or if there's something I should be prioritizing that I'm not seeing yet.

Thanks again — looking forward to it.

Frank

Frank Lucido Lucido Technology Consulting frank.lucido@gmail.com

What this email does

-  **Acknowledges Erin directly** (Lower School Head who set up Mosyle originally from her Hamlin experience) — opens with thanks for her time, not with credentials
-  **Names the ASM gap proactively** — 8 of N Macs, framed as a “small cleanup task” not a fault-finding exercise
-  **Locks Phase 1 in 4 numbered steps** — concrete, sequenced, defensible
-  **Names Apple's zero-touch enrollment** as the reason ASM cleanup matters (technical accuracy, no acronym soup)
-  **Keeps Apple Classroom as a Phase 1 deliverable** for middle school, framed around what the teachers have been asking for

-  **YouTube filtering policy with teacher toggle** — respects teacher autonomy, doesn't position Frank as gatekeeper
-  **Acknowledges Erin's on-campus window (7/27)** for the classroom-testing step — dates are explicit
-  **Two soft follow-ups** (Logitech keyboards, Procreate deployment) — research on Frank's side, no commitment ask
-  **References the inventory doc as a separate attachment** — doesn't bury the device-group cleanup in this email
-  **Peer/consultative tone** — "I'd suggest," "I think it's the right one," "Let me know if anything reads off" — partnership, not pitch
-  **Does NOT raise Google Workspace** — explicitly held for Phase 2 per 7/7 meeting doc decision

What still needs Frank's input before send

Item	Current value	Action
Dave's full name + email	<code><dave@northbridgeacademy.org></code> placeholder	Frank to fill from Erin's contact or NBA directory
Subject line	"Following up on Tuesday — Mosyle + Apple School next steps"	Confirm or rewrite
Procreate licensing decision	Per-student vs shared-cart — held to August	Confirm OK to leave as "we can decide closer to August"
Logitech keyboards	Held to compatibility research	Confirm OK to send

Item	Current value	Action
		separate research note later
Date for (2) and (3) classroom test	Week of 7/27 (per Erin's stated availability)	Confirm with Erin before locking

Process items surfaced (no action needed today)

- **Apple inventory list** being refined in parallel — separate deliverable, will attach once Erin's confirmed the structure
- **Google Workspace / northbridgeacademy.org domain admin** — explicitly Phase 2, NOT in this email, NOT in Phase 1 SOW
- **Lead → Contact promotion** — back-burner design item; triggers on Phase 1 SOW send (separate workstream)
