

North Bridge Academy — Discovery Meeting 2026-06-15

North Bridge Academy — Discovery Meeting

Date: June 15, 2026, 10:00 AM

Attendees: Shannon Barkocy (Head of School), Frank Lucido

Context: Warm referral from Dr. Lauren Ogren (School Counselor, WFC partner)

Recording: <https://drive.google.com/open?id=1hpTL-rQJwI4PGkJm48ICq1OPywQvoBa->

Needs Identified

The conversation surfaced four concrete IT infrastructure needs — not the website/data needs anticipated in the dossier:

1. MDM / iPad Management (PRIMARY)

- Currently managing iPads **manually, one-by-one** — no MDM in place.
- Mosyle was discussed as the leading option (“Apple Unified Platform” for K-12).
- Key Mosyle features: unified device management + security + internet filtering + identity, zero-touch deployment, classroom management tools, historically ~\$0.46/device/month.
- Need to determine: does North Bridge already have a Mosyle account? Can it be configured for 1:1 management, or is a different subscription needed?

2. Wi-Fi Infrastructure

- Current Wi-Fi described as **slow and unreliable**.
- Needs assessment and potential upgrade path.

3. Student Internet Safety / Content Filtering

- Need for web filtering and safety tools (GoGuardian was mentioned).

- CIPA compliance considerations.
- Mosyle includes encrypted DNS-based web filtering — possible bundled solution.

4. iPad Distribution

- 12 iPads to be provided to a STEM teacher for summer use.
- **Rest of iPad setup paused until August** — this buys time for MDM implementation before full rollout.

Action Items

#	Action	Owner	Due
1	Write follow-up email with MDM recommendations, Mosyle account review, Wi-Fi options, and security/safety tools	Frank	Tuesday 6/16 (tomorrow morning)
2	Provide 12 iPads to STEM teacher for summer	Shannon	Summer
3	Pause remaining iPad setup until August	Shannon	Now
4	Review proposed options over coming weeks; decide deliverables and ongoing support cadence (biweekly or monthly)	Both	Weeks of 6/16–6/29

Key Takeaways

- **This is a real, qualified lead** — concrete needs with budget-adjacent decision-making. Not a “just chatting” meeting.

- **Dossier was wrong about Shannon's role** — she is Head of School, not 4th Grade Teacher. Annie Crowder was expected but not present; Shannon may have stepped into the HoS role or Annie may have delegated.
- **Need profile is IT infrastructure / managed services**, not website/data/SIS. This is adjacent to LTC's core but deliverable — device management, network, security.
- **Timeline is friendly** — iPads paused until August. MDM evaluation and Wi-Fi assessment can happen over the summer. No fire drill.
- **Engagement model TBD** — could be project-based (MDM setup + Wi-Fi assessment) or ongoing retainer (monthly tech management). Discuss in follow-up.
