

North Bridge Academy — On-site Mosyle + Apple School Walkthrough (Erin)

2026-07-07

North Bridge Academy — On-site Mosyle + Apple School Walkthrough (Erin)

2026-07-07

△ **LIVE CAPTURE.** Frank is dictating this from the on-site walkthrough. Sections will be reorganized once the meeting completes. Treat as the working source of truth; backfill from this into the `[[leads/ltc-north-bridge-academy/dossier|dossier]]` after the meeting ends.

About Erin — Background (verbatim, lightly cleaned)

- Started at North Bridge four years ago. Came from **Hamlin** — an all-girls school in SF with deeply integrated tech.
- Erin is dyslexic herself; uses tech heavily herself daily.
- Taught third + fourth grade using iPads for project-based work in Keynote; incorporated accessibility features teaching into her classroom.
- This is the **why** Erin reached out — she lives the problem the school is trying to solve at scale.

iPad / Device History at NBA

- Erin's start: bought used iPads (gen 8 / 9) from Hamlin “for pretty cheap.” Other teachers saw it and the school bought more from Hamlin over time.
- **Last summer (2025) the Board approved a 1:1 iPad program.**
- Previous middle-school device: Chromebooks. Switched to iPads grades 2–8.
- Bought a bunch of new iPads to bridge the gap — **NBA now spans iPad generations.**

- **Logitech keyboards:** are being used. Some have to be upgraded because some came from Hamlin already aged.
- **Logitech keyboard purchase as a possible line item:** NBA may want to purchase newer Logitech keyboards as part of the engagement (specific model TBD — ask during walkthrough). Track as a **separate purchasing decision** (could be vendor-direct, Amazon Business, or CDW-G). Frank to research compatibility + pricing after the walkthrough; not bundled into Phase 1 SOW unless requested.

Mosyle / Apple School History (Erin's first-person account)

- Hamlin told Erin to use Mosyle.
- NBA got an **Apple School Educator account** and tried to integrate.
- **Year 1 of Mosyle at NBA:** “It was a disaster.” Erin was on her own. Used as much free help through Mosyle’s free channels as possible.
- **This past school year (2025–26):** Paid for Mosyle tech support.
- **Shannon** ran Mosyle last year while Erin was on maternity leave. Used “**Mosyle Sum**” (= Mosyle Manager, the product was rebranded — see [\[\[leads/ltc-north-bridge-academy/Mosyle MDM for Education — Comprehensive Research Summary|Mosyle research\]\]](#)).
- Erin notes: “It’ll be interesting for you and I to look at together and you can explain some of the things.” — Onboarding area for her, not just for the school.

How Devices Are Currently Organized

- **Per-homeroom iPad carts. 12 iPads per cart.** That’s the homeroom class size.
- Students know which iPad is theirs by **name label** (not profile-based).
- App deployment currently is **flat — push to the whole cart**. Teachers report apps installed per cart, not per student.
- Erin’s ideal state: push some apps **personalized per student**. Minimum partition: **Lower School vs Middle School** (“if you could do lower school and middle school would be best”). She doesn’t think grade-by-grade is necessary unless I think it is.
- **Students bring iPads with them** when they need them in STEM. STEM-specific apps: **Procreate** (paid, per seat), various websites.

Faculty Devices

- Every faculty member gets a **laptop from North Bridge**.

- Some faculty also have an **iPad** — but it's **not policy**. As-needed basis, “if someone’s asked then we’ve also given them.”
- These are **managed in multiple places** (not unified through Mosyle / ASM).

Apple School / ASM — Current Device Inventory (per Erin’s check day-prior)

See [[leads/ltc-north-bridge-academy/Apple iPad Accessibility Features — Complete Structured Inventory|Apple iPad inventory doc]] for the full breakdown Erin referenced.

Item	Count	Notes
iPads total	121	spans generations (Hamlin gen-8/9 used + new iPads for 1:1)
Macs	8 enrolled in ASM — odd, should be more. Erin noticed “only 8 of our Macs” — ASM enrollment likely missing the others.	
Apple TVs	8	deployed but unclear if classroom-managed

Middle-School Teaching Need — Classroom Management

- **Middle school teachers want to see what students are doing on the iPad.**
- Erin has used **Google Classroom** and **GoGuardian** for this.
- **Erin has NOT used Apple Classroom yet.** She believes it has “similar capability” (screen view, website, filtering).
- Confirmation: **Apple Classroom app on teacher iPad can see each student’s screen live.** This is the missing piece for middle school monitoring.
- **Filtering is also a top priority:**
 - Selective YouTube access per class — sometimes teachers want it, sometimes not.
 - Need per-class / per-app / per-time web filtering policy.

- GoGuardian comparison needed (Erin has GoGuardian experience; Mosyle OneK12 includes encrypted DNS filtering per the research).

What the School Actually Needs From Frank (Erin's list)

1. **Help with Mosyle organization.** Multi-year mess; needs a clean rebuild of device grouping, profile scope, app deployment structure.
2. **App deployment organized by Lower School vs Middle School** (with the option for per-student overrides later).
3. **Middle school classroom management / live screen view** (Apple Classroom + Mosyle Sum / Manager).
4. **Web filtering policy** with selective per-teacher / per-class controls — definitely includes YouTube gating.
5. **Clean up ASM enrollment** so all faculty Macs are in (currently only 8 of N are showing).
6. **Faculty iPad policy decision** — make it policy-driven, not ad-hoc.

Possible Additional Line Items (Frank follow-up, not Phase 1)

1. **Logitech keyboard refresh** — NBA may purchase newer keyboards. Specific models TBD (ask during walkthrough). Compatibility depends on iPad generation + case pairing (Combo Touch vs Crayon vs Rugged Folio behave differently). Phase 2 research + sourcing conversation.
2. **Google Workspace / northbridgeacademy.org domain admin** — Frank raised as a future conversation topic. See dedicated section below.

Open Questions Raised In-Conversation (still pending)

- How many Macs total? “Only 8” suggests several are missing from ASM. Get a full count during the walkthrough.
- How many Apple TVs are classroom-mounted? 8 total — verify classroom assignment.
- Is Mosyle currently in Free / Premium / OneK12 tier? (Annie green-lit OneK12 on 6/17 per dossier.)
- Are Logitech keyboards being tracked anywhere, or is the “upgrade list” just informal?
- **Logitech keyboard model(s) in use today** (Combo Touch / Crayon / Rugged Folio / other) — needed for compatibility + replacement sourcing research.

- Does Erin want Procreate deployment to be per-student licenses through ASM, or shared-cart?
- Are there any other paid web apps (besides Procreate) that need per-seat licenses?
- Per-student personalization roadmap — is Erin imagining this for the August rollout, or a Phase 2 conversation?

Google Workspace (northbridgeacademy.org domain) — Discussion Topic, Phase 2

Captured from Frank during / after the meeting: NBA may also want some help with their **Google domain** (i.e., Google Workspace for northbridgeacademy.org). Frank to bring this up at a future meeting — *not* Phase 1 scope.

What the dossier already says: NBA's stack today is **Wix (website) + Google Workspace (likely)** per [\[\[leads/ltc-north-bridge-academy/dossier#School-Profile|school profile\]\]](#). So they already have Workspace, but Frank doesn't yet know: - **Admin level:** What kind of admin access does Annie / Erin / Dave have on the Google Admin console? Is anyone formally the "Google admin"? - **User provisioning:** Are student + faculty + shared accounts set up cleanly? Google Classroom experience (Erin said she uses it a lot) implies they have classes provisioned. - **Apps & integrations:** Any Google Classroom co-deployment with Mosyle? Shared drives? File ownership / transfer policies? - **Domain registration:** Who owns the northbridgeacademy.org domain and when does it renew? (Renews are an annual footgun for small nonprofits — worth flagging even if Frank doesn't manage it.) - **SSO with Mosyle:** Per [\[\[leads/ltc-north-bridge-academy/Mosyle MDM for Education — Comprehensive Research Summary#key-features|Mosyle research line 152\]\]](#), Mosyle Auth 2 supports macOS SSO with Google Workspace. So Workspace  Mosyle is a real dependency for the auth story.

Frank's call: raise this in **the next full-engagement planning conversation** — not the 7/7 11 AM walkthrough, not in the Phase 1 SOW. Capture as a follow-up topic.

Why a separate topic, not Phase 1: - The Phase 1 work (Mosyle organization + LS/MS app partitioning + Apple Classroom live monitoring + filtering + ASM cleanup) is hands-on MDM ops. Google Workspace admin is a parallel track on a different vendor's console — different login, different admin model, different decision-makers (Erin / Annie / Dave may not all have Google admin access). - Mixing it would turn one SOW into two engagements. - Better to finish Phase 1, hand it over cleanly, then propose Phase 2 as a discrete add-on.

Live Conversation Continues

More to come as Frank continues to dictate.

Action Queue (back-burner during meeting)

☐

Pull up Mosyle admin console on the Mac. Capture: device groups, profiles, current licensing tier, MDM enrollment status.

☐

Pull up Apple School Manager next to it. Capture: Managed Apple ID count, ADE/DEP device count, Apps & Books licenses, Mac enrollment gap.

☐

iPad closet walk-through — label scheme, Logitech keyboard condition.

☐

One classroom walk-through — Apple TV, charging, current app set.

☐

15-min planning chat at end: confirm next meeting, August rollout owner-by-owner.

☐

Dave's full name + role (Annie said "another one of our staff" — generic).

☐

Confirm Erin is on campus again 7/27 + after, for follow-up.

☐

Reconcile Erin's "8 Macs only" finding — find the missing Macs.

☐

Capture **Logitech keyboard models currently in use** at NBA — needed for compatibility + sourcing research.

☐

Confirm whether NBA is buying keyboards through vendor-direct (Apple, Logitech), Amazon Business, or CDW-G — frame Phase 2 sourcing conversation accordingly.

☐

Defer Google Workspace question to next engagement-planning meeting — do NOT bring up at 7/7 11 AM walkthrough, do NOT include in Phase 1 SOW.

Frank — Continuation Prompt

If you're pasting more notes from your conversation with Erin, just keep going — I'll append. When you're done, say **“end of meeting”** or **“that's all the notes”** and I'll:

1. Reorganize this doc into a clean meeting record.
2. Cross-link from the North Bridge [[leads/ltc-north-bridge-academy/dossier|dossier]].
3. Update the [[Daily/2026-07-07]] L2 loop status.
4. Surface the SOW/SOW-input implications (see next reply).

Process Items Surfaced This Session (traceability)

- **Logitech keyboard purchase line item** — see “ Possible Additional Line Items” above; covered in [[Daily/2026-07-07|L17 back-burner item]].
- **Google Workspace / northbridgeacademy.org domain admin** — future conversation topic; see [[Daily/2026-07-07]] dedicated section; do NOT bundle with Phase 1.
- **Lead → Contact promotion process** — back-burner / process design item. Full sketch in [[Daily/2026-07-07#Lead-Contact-Promotion-Back-burner]]. Triggers: North Bridge on Phase 1 SOW send; Susan Allen on her signature.
