

North Bridge Academy — Meeting Prep 2026-06-25

North Bridge Academy — Meeting Prep: Annie Crowder

Date: Thursday, June 25, 2026 at 1:00 PM **Attendees:** Annie Crowder (Head of School), Frank Lucido **Context:** Annie requested a 1-on-1 — no Shannon, no Avram. Wants to discuss “what their needs might be.”

5-Minute Brief

Annie Crowder is Head of School at North Bridge Academy, a tiny (68-student, grades 2-8) private non-profit in Mill Valley exclusively serving dyslexic learners. She green-lit three workstreams on 6/17: Mosyle OneK12 (iPad MDM + content filtering), Wi-Fi assessment, and a needs summary for the admin team.

Avram (IT Coordinator) has since provided a detailed network assessment. The network is stable but has deferred maintenance: UPS gaps, an outdated Unifi management system controlled by WiLine (legacy vendor), and a cramped IP subnet layout that will become a problem if device count grows. Larger opportunities exist around AT&T fiber and Starlink failover.

This meeting is Annie asking Frank to synthesize what he's seeing and recommend a path forward. She's the decision-maker and wants Frank's read before bringing Avram back in.

Meeting Goals

1. **Understand Annie's framing** — what does she mean by “what their needs might be”? Is she looking for a scope recommendation, a budget ballpark, or a prioritization?

2. **Present network assessment synthesis** — distill Avram's findings into clear tiers (urgent, important, opportunistic)
 3. **Confirm Mosyle path** — Shannon is away, but Mosyle OneK12 was green-lit. Confirm timeline and next step for account access.
 4. **Establish engagement model** — project-based assessment, ongoing retainer, or phased approach?
 5. **Set next meeting cadence** — when to include Shannon and Avram, what Frank delivers next
-

What We Know (Pre-Meeting)

Workstream 1: Mosyle OneK12 — GREEN LIT

- Annie approved 6/17. Shannon to give Frank account access.
- Shannon is away this week — **don't push Mosyle in this meeting.**
- Status: Awaiting Shannon's return for account access + review.

Workstream 2: Network — Avram's Assessment Complete

Avram's findings, tiered:

Tier	Item	Action
 Urgent (this summer)	UPS gaps — 2nd floor switch + 1st floor battery	Buy battery or replace 1st floor unit. Get 2nd floor switch on UPS.
 Urgent (this summer)	IP subnet reconfiguration	Logical redesign before device count grows. Project-level work.
 Important	Unifi management upgrade	Only WiLine can do this. If they won't, consider bringing management in-house.
 Important	Router firmware update	Avram will do remotely. Routine.
 Opportunistic	AT&T fiber inquiry	Huge speed/reliability improvement. Installation may be complex (months). Annie may have hesitancy — explore.

Tier	Item	Action
 Opportunistic	Starlink failover	Automatic failover via Unifi. Investigate residential vs. commercial pricing.

Avram's bottom line: Nothing is urgent now, but proactive summer work is much safer than in-session firefighting.

Workstream 3: Needs Summary for Admin Team

- Annie asked Frank to give admin team a summary of “what we need for the upcoming year” — what Avram can manage, what Shannon tackles, where Frank supports.
- This meeting is effectively the input to that summary.
- **Output:** Frank should leave with enough to draft the summary, then send to Annie for review before sharing with the full admin team.

Questions for Annie

Framing

- “When you say ‘what their needs might be’ — are you looking for a scope recommendation, a rough budget, or a prioritization of what to tackle first?”
- “How do you see Frank’s role vs. Avram’s? Avram clearly knows the network well. Are you looking for Frank to supplement, project-manage, or take over certain areas?”

Network

- “Avram mentioned some hesitancy around the practical side of AT&T fiber. Can you tell me more about that?”
- “WiLine — is there a relationship you want to preserve, or would you be open to bringing Unifi management in-house if they won’t upgrade?”
- “What’s the budget reality for network improvements? Are we talking hundreds, low thousands, or is there room for a larger infrastructure investment?”

Mosyle

- “Shannon’s away this week — no rush, but when she’s back, what’s the best way to get me access to the Mosyle account?”
- “Are teachers expecting something specific from the MDM rollout in August, or is this more about getting ahead of the problem?”

Engagement

- “How are you thinking about the engagement model? One-time project to get everything set up, or ongoing support during the school year?”
 - “What would success look like from your perspective by the time school starts in August?”
-

What NOT to Do

-  Don’t push on Mosyle access while Shannon is away — note it, move on
 -  Don’t badmouth WiLine or Avram’s work — Avram has been thorough and proactive
 -  Don’t lead with pricing — Annie wants to understand needs first
 -  Don’t over-scope — this is a 68-student school. Keep recommendations proportionate.
 -  Don’t forget Lauren’s dual role — she’s WFC partner AND NBA school counselor. Keep boundaries clear.
-

After-Meeting Checklist

☐

Save meeting notes to `leads/ltc-north-bridge-academy/meeting-2026-06-25.md`

☐

Update dossier with new findings, decisions, and next actions

☐

Update pipeline — move stage, set next action

☐

Draft needs assessment summary for admin team (if scope is clear)

☐

Update daily note with meeting outcome

☐

Update MEMORY.md

☐

Schedule any follow-up meetings (with Avram, Shannon, or full admin team)
