

North Bridge Academy — Meeting Prep

North Bridge Academy — Meeting Prep Brief

Meeting Details

Field	Detail
Who	Frank Lucido + Annie Crowder (Head of School) + Shannon G. Barkocy (4th Grade Teacher)
Intro by	Lauren Ogren (WFC partner, NBA School Counselor)
Format	Virtual
Date	Week of June 15 (TBD)
Goal	Discovery — identify needs, assess LTC fit

5-Minute Brief (Read Before Meeting)

The school: North Bridge Academy, Mill Valley. Tiny private non-profit (~68 students, grades 2-8) exclusively serving dyslexic learners. Founded 2015. Uses multi-sensory, direct instruction. Website on Wix.

The people: - **Annie Crowder** — Head of School. 20+ years leading schools for kids with learning differences. Strengths-based philosophy. She's the decision-maker. - **Shannon G. Barkocy** — 4th Grade Head Teacher. On the thread because the need likely touches the classroom. - **Lauren** — School counselor, made the intro. Knows Frank's tech background but likely hasn't defined a specific ask.

The play: This is NOT a standard LTC lead (not a public district, no SIS/CALPADS). This is a warm discovery conversation. Listen 80%, talk 20%. Don't pitch until you understand the problem.

Most likely needs (ordered by probability): 1. **Website/admissions overhaul** — private schools compete on web presence for enrollment 2. **Student data/tracking** — IEP/learning plan management for a specialized school 3. **General tech consulting** — small school with no dedicated IT

What NOT to do: - Don't pitch SIS migrations, CALPADS, or district-scale data infrastructure - Don't overpromise because Lauren made the intro - Don't quote prices in this meeting — it's discovery only

Discovery Questions (Annotated)

Opening (2 min)

“Lauren thought it'd be worth connecting — what made her think of me for North Bridge?”

This surfaces the unstated need. Let Annie/Shannon define the problem.

Current State (5 min)

“Can you walk me through what technology looks like at North Bridge right now? Student information, parent communication, admissions, fundraising — what tools are you using?”

Map the tech landscape before suggesting anything.

Pain Points (5 min)

“What's the thing that makes you say 'there has to be a better way'?”

Get to the real friction. Listen for emotional language — that's where the budget lives.

Vision (3 min)

“If we fixed the right thing this summer, what would be different when school starts in the fall?”

Timeline framing. Summer is the window for school projects.

Decision Process (2 min)

“If this conversation leads somewhere, who else needs to be in the room? Board? Business Director?”

Identify the real buyer. Katherine Monge Arriaza (Business/HR Director) and Julia Myers (Asst. Head) may be relevant.

LTC Service Adjacency Map

Use this silently to route the conversation. Don’t name-drop these unless the need aligns naturally.

If they mention...	That maps to...	LTC can...
“Our website is hard to update”	Web/CMS	WFC-aligned work (Frank can execute)
“We can’t track student progress well”	Data systems	Lightweight data pipeline, Google Sheets → dashboard
“Parents can’t find information”	Communications	Parent portal audit, tool consolidation
“Admissions takes too much time”	Process automation	Form workflow, CRM setup
“We’re worried about data privacy”	Security/Compliance	FERPA-aligned practices (even for private schools)

If they mention...	That maps to...	LTC can...
"Our teachers spend too much time on admin"	Workflow	Automation, tooling simplification

After the Meeting

☐

Update dossier with actual needs identified

☐

If qualified: move to LTC pipeline → proposal path

☐

If not qualified: document as "warm contact, no current fit"

☐

Thank-you email within 24 hours (regardless of outcome)
